</tbody>
</table>

### Focus on app

- **New Hardware (Fedora Infra)**
  - Create mining infrastructure
  - Explore mining options

### Other

- **Mass rebuild**
  - Replace Nagios with Zabbix in Fedora

### Mini-initiatives

- **Ports app to OIDC**
  - Create an openshift config file to migrate

### Other

- **Update of kernel test app**
  - Badges backend for new Service

### ARC

- **Frontend and backend development**

---

### Focus on app

### Mass update/reboots
